1

Curricular assessment

- Research about academic programs and instructional innovations to evaluate and improve the student experience and learning

Student assessment

- Giving feedback to students:
 - Graded (e.g., tests, quizzes, papers)
 - Ungraded (e.g., faculty feedback to students)
 - Student self-assessment (e.g., "I need to improve in...")

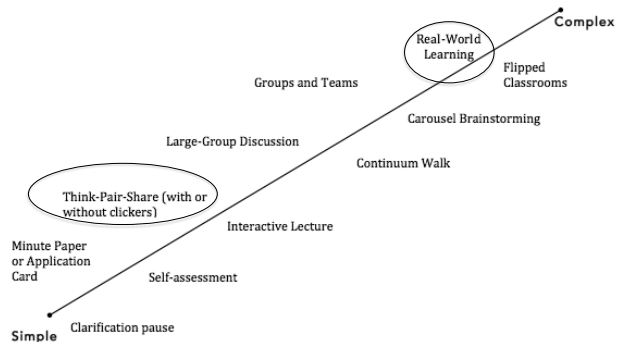

2

Agenda

- ① University of Michigan trends
- ② Assessment to promote learning
- ③ Authentic assessment
- ④ Gamification
- ⑤ Questions?

3

Continuum of Active Learning Strategies

U-M Trends: Transformative Learning

\$25 million initiative to promote:

- Creativity and innovation
- Intercultural and ethical intelligence
- Communication, collaboration & teamwork
- Leadership and civic engagement

How can assessment promote these goals?

5

Universidad de los Andes Principales Lineamientos Enstratégicos

- Los egresados de la Universidad de los Andes se distinguirán por ser:
 - Personas formadas interdisciplinariamente...
 - Personas formadas en las competencias claves requeridas para desempeñarse en el medio laboral actual.
 - Personas con actitud de apertura, acogida y diálogo con los demás

6

Most Effective Learning Techniques

Technique	Description	Utility for Learning
Practice Testing	Self-testing or taking practice tests over to-be-learned materials	High
Distributed Practice	Implementing a schedule of practice that spreads out study activities over time	High
Interleaved practice	Implementing a schedule of practice that mixes different kinds of problems or material within a single study session	Moderate
Elaborative interrogation	Generating an explanation for why an explicitly stated fact or concept is true	Moderate
Self-explanation	Explaining how new information is related to known information or steps taken during problem-solving	Moderate
Keyword mnemonic	Using keywords to associate verbal materials	Low
Imagery	Forming mental images while reading or listening	Low
Rereading	Restudying text material again	Low
Summarization	Writing summaries of texts	Low
Highlighting/underlining	Marking key portions of texts	Low

Summarized from Tables 1 and 4 of Dunlosky, J., et al. (2013). Improving students' learning with effective learning techniques: Promising directions from cognitive and educational psychology. *Psychological Science in the Public Interest*, 14(1): 4-58.

7

Traditional Assessment

8

"They are not authentic; the way people make decisions in the real-world is forming the right answer in their minds, not finding it in a list. We want them to find that answer in their own minds based on their knowledge and understanding."

-Chancellor of CQ University, Australia

9

Which Is The Better Vehicle to Arrive at the Goal?

Traditional Assessment

Transformative Assessment:

Working in groups

Real-world tasks and evaluation

Learning how to learn

U-M Learning Goals:

- Creativity and innovation
- Intercultural and ethical intelligence
- Communication, collaboration & teamwork
- Entrepreneurial mindset

10

New Assessment Models

- Authentic assessment
- Gamification
 - Tournament approach to peer grading

11

Authentic Assessment

- Demonstrate application of skills, knowledge or attitudes
- Common characteristics:
 - Public
 - Involve some collaboration
 - Representative challenges of a field or subject
 - Ill-structured tasks

Grant Wiggins, "27 Characteristics of Authentic Assessment," Available: <http://www.teachthought.com/learning/27-characteristics-of-authentic-assessment/>

12

Complex Example of Authentic Assessment

Bill Lovejoy, Ross School of Business and
Stamps School of Art & Design

John Marshall, Stamps School of Art & Design and
Architecture and Urban Planning

Think – Pair - Share

***What is an assignment in your course
that would lend itself well
to authentic
assessment?***

16

Agenda

- ① University of Michigan context
- ② Assessment to promote learning
- ③ Authentic assessment
- ④ Gamification
- ⑤ Questions?

17

School is a Game

But is it a *good* game?

The Challenge We Face

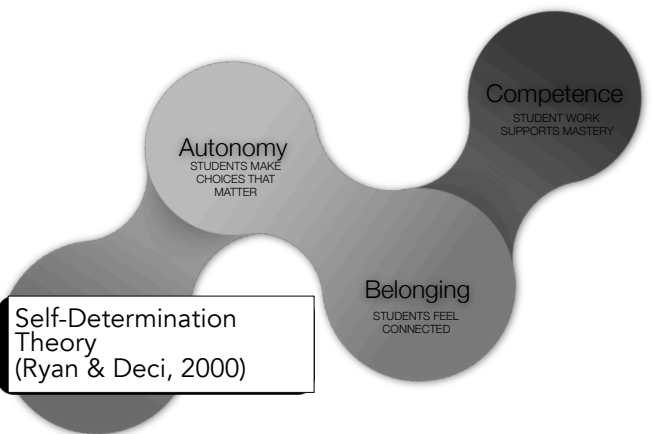

- We want students to:
 - be **deeply engaged** with subject matter
 - work hard and take on intellectual **challenges**
 - **take risks**
 - be **resilient** in the face of failure
- But the way our educational system is designed (including at Michigan) encourages exactly the **opposite behaviors**

Which Brings Us to...

- Games as models for learning environments
- **Well-designed** games:
 - Get players **engaged** early, and keep them engaged
 - Appeal to players' sense of **curiosity** (What will happen next?)
 - Encourage players to **take risks**
- People play well-designed games **BECAUSE THEY ARE CHALLENGING**, not despite the challenge

How can we make our courses into better games?

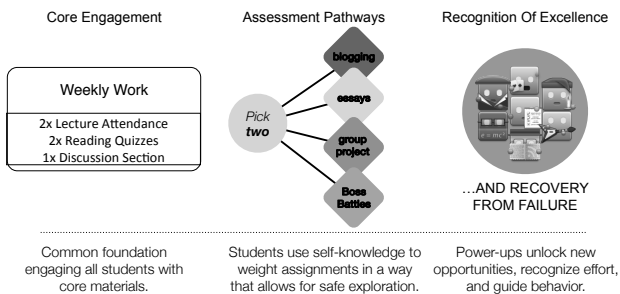

WHAT ARE THE ATTRIBUTES OF GOOD GAMES/COURSES?

THE DESIGN OF FOUR GAMEFUL COURSES

POLSCI 101: Intro to Political Theory

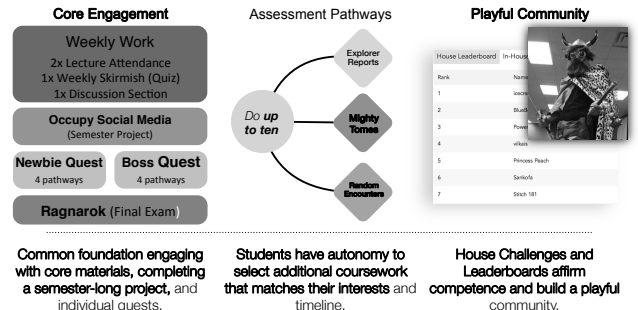

Emphasis: Personal Responsibility & Planning

THE DESIGN OF FOUR GAMEFUL COURSES

SI110: Intro to Information Studies

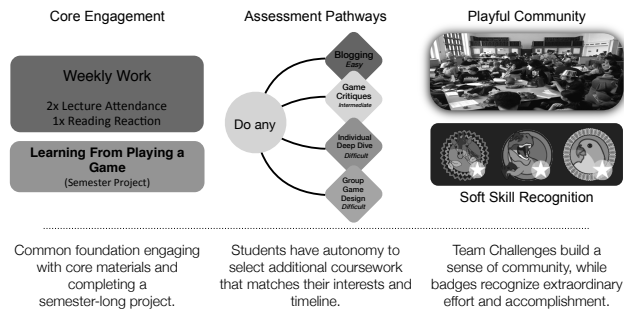

Emphasis: Exploration & Experience

THE DESIGN OF FOUR GAMEFUL COURSES

EDUC222: Videogames & Learning

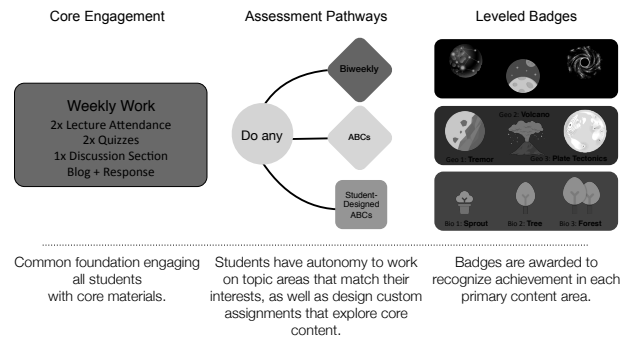

Emphasis: Collaboration, Exploration, and Skill Development

THE DESIGN OF FOUR GAMEFUL COURSES

HON242: Deep Time

Emphasis: Exploration & Specialization

Tournament Approach to Peer Review

Physics: Intermediate Electricity and Magnetism

Dave Winn, Jared Tritz, Nicole Michelotti

Traditional Peer Review

Feedback for few students
Not anonymous
Often in person

Tournament Approach

Many students
Anonymous
Often online

Round 1

Round 2

27

1.12
Height of hill (ft): $h(x,y) = 10(2xy - 3x^2 - 4y^2 + 12)$
y: distance north (mi)
x: distance east (mi)

"It would be easier to follow if you put your work under the corresponding part."

Problem 1.12
 $h(x,y) = 10(2xy - 3x^2 - 4y^2 + 12)$
 $h_x = 10(2y - 6x - 12)$
 $h_y = 10(2x - 8y - 12)$
 $h_x = h_y = 0$ at local maxima/minima
Solve system of equations:
 $\begin{cases} 2y - 6x - 12 = 0 \\ 2x - 8y - 12 = 0 \end{cases}$
Solving for x and y:
 $2y = 6x + 12 \Rightarrow y = 3x + 6$
 $2x - 8(3x + 6) - 12 = 0$
 $2x - 24x - 48 - 12 = 0$
 $-22x - 60 = 0 \Rightarrow x = -\frac{60}{22} = -\frac{30}{11}$
The top of the hill is 18 mi north and 3 mi east of South Hadley.

"Part A and B: Great Explanations where the root 2 came from at calculation great explanations"

Workshop at:
<https://rebuild.lsa.umich.edu/psot/>

29

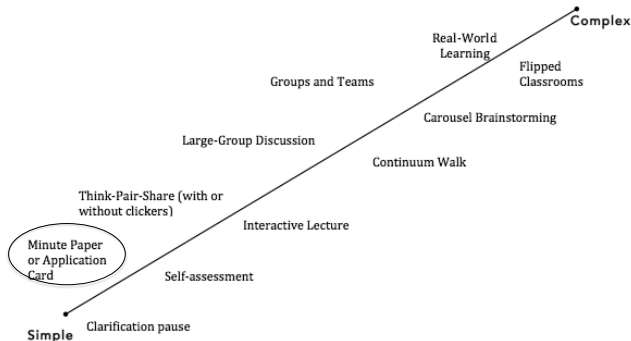

Student Survey Feedback

- Benefits
 - Greater variety of solutions
 - Incentive to make solutions clear and to show work process
- Drawbacks
 - Could learn incorrect answers
 - Students could pick neatest answers

"I believe I learned more from them than if they were traditionally graded."

30

Continuum of Active Learning Strategies

This is a spectrum of some active learning activities arranged by complexity and classroom time commitment.
